HEXAWARE

Priyanshu Lodha

Synopsis: Results-driven Full Stack Engineer and Computer Engineer with extensive experience in enterprise application development, production support, and systems integration for high-stakes financial platforms. Experiencd in React, TypeScript, .Net Core, SQL Server, Auth0, Salesforce and Prod-Support. Proven track record optimizing developer lifecycles, accelerating feature delivery velocity by 5x using specialized AI agents and complex orchestration workflows.

EXPERIENCE SUMMARY

- Architected and optimized core components of Carlyle's LP Connect investment platform utilizing a .NET Core backend microservices framework and a React frontend ecosystem
- Engineered custom AI-driven developer task agents and a systematized orchestration engine in Cursor AI for accelerated impact analysis, code implementation, and validation testing, scaling feature delivery productivity by 5x.
- Maintained 24/7 application reliability by driving end-to-end L2/L3 production support, deep debugging, complex hotfixes, impact analysis, and root-cause remediation.
- Seamlessly integrated cloud-native infrastructures using AWS ECS container orchestration, Lambda microservices, computerized S3 storage, RDS, CloudWatch monitoring, and secure Auth0 user identity management.
- Collaborated within an Agile team of 15 engineers, QAs, and Business Analysts to unify database layers with enterprise systems like Salesforce, EBX-MDM, and Appian workflows.

QUALIFICATION

Degree	Institute	Year
Bachelors of Computer Engg (CSE)	SNJB's Late Sau KBJ college of Engg, Nashik	2023

Areas of Experience

Languages
C #, Python, SQL (MSSQL), C++, HTML

Frameworks & Platforms
React, .NET Core, Entity Framework, LINQ, REST API, Flask,

Operating Systems
Windows 7/8/10

Database
SQL SERVER

Testing Tools
NUnit, Moq, Postman, Swagger

Other Tools & Skills
AWS, Cursor AI, Git, , ServiceNow, Auth0 GenAI (LLMs),

Certification	Institute	Year
Claude Certified Architect - Foundations	**Anthropic**	**2026**
Claude Certified Developer	**Anthropic**	**2026**
Claude Certified Associate	**Anthropic**	**2026**
Microsoft Azure Fundamentals (AZ-900)	**Azure**	**2024**

Working with Hexaware Technologies Ltd. From May 2024 – Till date

PROJECT EXPERIENCE

Project Name : LPConnect
Environment : Windows
Technology : React, TypeScript, .NET Core Web API, Entity Framework Core, SQL Server, Redux Toolkit, Auth0
Duration : Sept 2024 – Present
Tools Used : CursorAI ,Visual Studio, VS Code, Git, Azure DevOps, Postman

Description : LPConnect is an enterprise investor portal developed for a global private-equity client, enabling investors and fund managers to securely access investment information, documents, account details, and fund-related activities. The platform supports role-based access management, document workflows, user administration, and self-service capabilities while ensuring secure and scalable access to critical investment data.

Roles and Responsibilities:

- ☐ Developed and maintained business-critical features using React, TypeScript, and .NET Core Web API.
- ☐ Implemented and enhanced RESTful APIs, ensuring secure and efficient communication between frontend and backend systems.
- ☐ Engineered custom AI-driven developer task agents and a systematized orchestration engine in Cursor AI for accelerated impact analysis, code implementation, and validation testing, scaling feature delivery productivity by 5x
- ☐ Developed self-service workflows for account access management, user administration, and role-based authorization.
- ☐ Integrated Auth0 authentication and authorization mechanisms to support secure user access across application modules.
- ☐ Worked with Redux Toolkit for application state management and optimization of complex user workflows.
- ☐ Developed and executed unit and integration tests using Jest, React Testing Library, NUnit, and Moq to improve application reliability.
- ☐ Maintained 24/7 application reliability by driving end-to-end L2/L3 production support, deep debugging, complex hotfixes, impact analysis, and root-cause remediation.
- ☐ Collaborated within an Agile team of 15 engineers, QAs, and Business Analysts to unify database layers with enterprise systems like Salesforce, EBX-MDM, and Appian workflows.

PREVIOUS WORK EXPERIENCE

Project Name	**:** Hotpot - Online Food Delivery System
Role	**:** PGET Trainee
Environment	**:** Windows, MacOS
Duration	**:** May 2024 – Jul 2024.
Tools Used	**:** C#, ASP .NET, Entity Framework, MS SQL Server. React

Description: Hotpot is food delivery platform that aims to simplify the process of ordering food from local restaurant based on city. The platform provides a convenient way for users to browse through various restaurant menus, place orders, and have their favourite dishes delivered to their doorstep. With a user-friendly interface and seamless ordering experience, Hotpot caters to food enthusiast looking for quality meals without the hassle of cooking or dining out.

Roles and Responsibilities:

- ☐ Creating a brand-new app from scratch, managing user info securely with JWT Token-based authentication as per roles.
- ☐ Making fast API calls with ASP.NET core WebAPI, ensuring compatibility across different systems with .NET Core.
- ☐ Testing thoroughly with NUnit to catch and fix any bugs in the code.
- ☐ Using MS SQL Server to store user data efficiently.
- ☐ Designing a neat and easy-to-use interface with React.js.
- ☐ Keeping the Trainee Head updated on how the project is going.

HEXAWARE

Achievement:- Runner-up at Maverick Designathon 2026

Description: Maverick Certification Hub is an innovative Certification Drive Automation platform designed to transform the endto-end management of certification initiatives. The application automates the creation and administration of certification drives, centralizing all drive details—such as timelines, sponsors, target audiences, and policies—in a secure, role-based repository. MaverickMAP streamlines candidate communication with automated email responses for registrations, eligibility updates, results, and voucher issuance, ensuring timely and consistent engagement. The platform features a powerful rules engine for eligibility validation, enabling automated and accurate voucher allocation based on configurable criteria. It eliminates manual errors and duplicate voucher distribution while providing real-time dashboards for tracking participation, pass rates, voucher utilization, and ROI. With comprehensive audit logs and exception handling, MaverickMAP ensures full compliance, visibility, and accountability, empowering organizations to deliver seamless, efficient, and scalable certification drives

Roles and Responsibilities:

- ☐ Creating a brand-new app from scratch, managing authentication using AWS cognito
- ☐ Making api calls using NestJS and frontend also
- ☐ Integrated AI using Bedrock Api key - Nova 2 Lite model
- ☐ Using Neon Db to store user data efficiently.
- ☐ Designing a neat and easy-to-use interface
